

FLOOR GRAPHIC SOLUTION

May 2020

Experts in "What If..."

Wausau Coated Products introduces a specialty two-component floor graphic solution system.

This system is composed of flexible vinyl film for printing graphics and a slip resistant over-laminate used for protection of those graphics.

Our Dual Digital 3.4 mil White Flexible Vinyl base material is engineered for HP Indigo sheet fed presses and production toner presses. It features a special graphics removable adhesive that removes cleanly from concrete, tile, laminate or vinyl flooring.

When paired with our 4 mil Textured Clear Polypropylene Over-Laminate, your graphics will withstand foot traffic, daily cleaning and provide a slip-resistant surface to showcase your message.

For additional information contact our Customer Service Department at **800-345-8039** or visit our website **www.wausaucoated.com**.

Available now in 13 x 19 sheet size. Other sizes coming soon with paired over-laminate rolls.
